

Goal # 5: Global Health

Dr. Mason

- Consensus on need for global health goal in the National Vaccine Plan
- Increase communication regarding the relevance of global health to US citizenry
- Work out the tension between “achievable” and “aspirational”—and in that context, address the leadership role of the US (federal or national?)

Goal # 5: Global Health

Dr. Mason (2)

- Plan reflect US support for globally agreed-to goals
- Incorporate the importance of sustainability of goals throughout plan
- Incorporate recognition that our commitment to global health should reflect our foreign policy interests; there should be greater communication between foreign policy and global health stakeholders

Goal # 5: Global Health

Dr. Mason (3)

- Plan should better identify all potential partners and stakeholders in global health (e.g., academic organizations, NGOs, professional associations, and manufacturers) and should reach beyond traditional partnerships in the immunization world

Goal # 5: Global Health

Dr. Mason (4)

- Ensure that content is cross-referenced, so that relevant partners and initiatives are recognized throughout the plan
- Immunization should be an integral part of providing prevention and treatment services
